

## USB MEMORY STICK

### datAshur

- 256-bit AES Hardware Encrypted
- FIPS 140-2 level 3 validated
- Waterproof MIL-STD-810F
- PIN code activated 7-15 digits (alphanumeric)
- Available in 4GB, 8GB, 16GB and 32GB

## EXTERNAL USB DISK

### diskAshur

- FIPS PUB 197 validated Encryption Algorithm
- 256-bit AES Military Grade Encryption
- Integrated USB cable
- Alpha Numeric keyboard
- Up to 10 user accounts
- PIN code activated 6-16 digits (alphanumeric)
- Plug and Play - no installation needed
- Super Speed USB 3.0 (backward compatible)
- Emergency Destruction Password
- Rubber Coating
- Available in 4GB, 8GB, 16GB and 32GB

USB 3.0

## CRYPTO ADAPTER

This is an encryption device of very high security. It is connected to a USB port on the computer.

This Crypto Adapter encrypts regular memory sticks or USB drives that are non encrypted.

By using a two factor authentication (smart card *and* PIN code) the digital information that is connected in the devices port will be encrypted/decrypted.

- 256-bit AES hardware encrypted
- FIPS 140-2 level 3 Certified
- Common Criteria EAL 4+ Certified

Upon request several Crypto Adapters can be synchronised, making it possible for several Crypto Adapters to decrypt the same storage media.

## SECURIRAM

### THE SELF ERASING USB DRIVE

SecuriRAM is a self-erasing USB drive made for transporting a limited amount of information. Its unique feature is the ability to completely erase all its content, either manually by the user or automatically after 24 hours of inactivity.

Available in i 64 Mb.

## QUICK SECURE VPN

### iTwin

Get securely connected between two or more computers in a VPN computer network.

- 256-bit AES Hardware Encrypted Military Grade
- 2 Factor Authentication (password + hardware)
- Plug and Play

Also to be used to encrypt/decrypt files uploaded/download to the Cloud Dropbox.
